

## **Jobs and Taxes?**

Companies like Spectra Energy claim that their ventures benefit communities by bringing “thousands of jobs”, by “adding capital investment” and by “increasing the tax base”.

In reality the number of permanent jobs are at best in the dozens, and there are no guarantees that these will go to people in your community.

Moreover, pipeline companies receive special tax breaks that translate to lower federal revenues, so that American taxpayers have to pick up the slack.

## **A Clean Energy Future?**

If we really are interested in jobs and a clean, secure energy future, states like Florida (the “Sunshine State”), Georgia and Alabama should invest in renewable and clean sources of energy like solar. There are more jobs in the solar industry than in coal, oil and natural gas!

Natural gas is a fossil fuel and by nature finite. Making us more dependent on natural gas is not a recipe for a secure energy future.

Natural gas may burn cleaner than oil and coal, but the process used to extract it (“fracking”) bares dire consequences for the environment, our drinking water, and the health of US citizens.

### **GO SOLAR!**

No spills!  
No pollution!  
No explosions!

## **How Can We Stop the Pipeline?**

If you are a landowner, say NO to the survey! This will slow down the process Sabal Trail LLC must go through to seek approval. If you have already agreed, call your contact agent and pull your permission.

Landowner or not, contact your elected officials (City, County, State Representatives, Senators) and express your concerns.

Visit [FERC.GOV](http://FERC.GOV) and file an eComment. To file a complaint electronically go to [www.ferc.gov](http://www.ferc.gov). Go to “Documents and Filings”, then to “eComment”, fill out the required information, and you will receive an email with a link to a comment form.

Search and select [Docket Number PF14-1](#) and enter your comments. The more of us object to this pipeline, the better!
